

Dr. Sandor Demeter received his BSc (1986) and MD (1989) from the University of Saskatchewan. Thereafter he obtained his Canadian Royal College Fellowship (FRCPC) in Community Medicine/Public Health (1994), and a Masters of Health Science in Community Health and Epidemiology (1993), both from the University of Toronto. He worked in Public Health in Ottawa (Field Epidemiologist), Southern Ontario (Medical Officer of Health and Commissioner of Public Health) and Edmonton (Deputy Medical Officer of Health) before training in Nuclear Medicine, at the University of Alberta, where he obtained his Canadian Royal College certification in Nuclear Medicine (2002), as well as a MSc (2004). Dr. Demeter joined the Section of Nuclear Medicine at the Health Sciences Centre in Winnipeg Manitoba in 2002. He became the Nuclear Medicine Section Head in 2004 as well as being the Co-Director of the Winnipeg PET/CT program. He was appointed (2009-2012), as the Regional Clinical Director of the Diagnostic Imaging Program as well as the University of Manitoba Academic Chair of Radiology. He is an Associate Professor with the University Of Manitoba Faculty Of Medicine with joint appointments in Radiology and Community Health Sciences. He currently is a Physician Advisor to the Canadian Nuclear Safety Commission on matters pertaining to human health effects of ionizing radiation. His main research interests include technology and diagnostic imaging related health economics, health policy and risk communication.
