

## **Dr. Donald L. Miller**

**Donald L. Miller, M.D.**, is the Chief Medical Officer for Radiological Health in the U.S. Food and Drug Administration's (FDA) Center for Devices and Radiological Health. He earned a B.A. in Molecular Biophysics & Biochemistry from Yale University in 1972, an M.D. from the New York University School of Medicine in 1976, and completed a residency in diagnostic radiology and fellowship in interventional radiology at the New York University Medical Center. He holds Board certification in both Diagnostic Radiology and Interventional Radiology.

Prior to joining FDA, Dr. Miller engaged in the clinical practice of interventional radiology for nearly three decades. During most of this time he was a Professor of Radiology and Radiological Sciences at the Uniformed Services University of the Health Sciences. He was also an adjunct investigator in the U.S. National Cancer Institute's Radiation Epidemiology Branch, and has authored more than 160 publications in peer-reviewed journals. His research interests center on radiation protection in medicine.

Dr. Miller is a Fellow of both the Society of Interventional Radiology and the American College of Radiology, and is an Honorary Member of the American Association of Physicists in Medicine. He is a consultant to the International Atomic Energy Agency and the World Health Organization on issues related to radiation protection in medicine. He was elected to the U.S. National Council on Radiation Protection and Measurements (NCRP) in 2006, and currently serves as Co-Chair of NCRP's Program Area Committee 4 (radiation protection in medicine).

Dr. Miller became a member of ICRP Committee 3 in 2010, and serves currently as Vice-Chair of the Committee. He was an author of ICRP Publication 117 and Co-Chair for ICRP Publication 120.
