

# FREE THE ANNALS

THE 90<sup>TH</sup> ANNIVERSARY DRIVE FOR THE INTERNATIONAL COMMISSION ON RADIOLOGICAL PROTECTION

ICRP is an international, independent registered charity, relying on voluntary contributions to support our work. Our ~250 expert members from more than 30 countries and all disciplines relevant to radiological protection volunteer their time to ICRP. Together we develop the System of Radiological Protection, which forms the basis of standards, legislation, guidance, programmes, and practice worldwide. This helps ensure that patients, workers, the public, and the environment are protected against detrimental effects of radiation exposure. **Separate from our general programme of work, the restricted funds raised through this initiative go directly to our publisher and recouping lost revenue from royalties.**

## ICRP STRATEGIC PRIORITIES

- ❖ Maintain and continue to improve the System of Radiological Protection
- ❖ Promote Awareness of Radiological Protection and broaden access to ICRP recommendations
- ❖ Increase engagement with professionals, policy-makers, and the public

**What We Need:** Contributions are needed from a diverse range of supporters, especially those with a stake in radiological protection.

BY THE END OF 2018, WE ARE AIMING TO RAISE **€500 000**, AND WE ARE ALREADY **25%** OF THE WAY THERE!

## FREEING THE ANNALS WILL:

- ❖ Make all publications, save for the most recent rolling two-years, free-to-access!
- ❖ Address challenges with access to recommendations in developing regions, ensuring protection of patients, workers, the public, and the environment world-wide
- ❖ Simplify the distribution to Regulators, learning institutions, the professional workplace, and public use
- ❖ Promote collaboration across the radiological protection community
- ❖ Recognise and promote the organisations responsible for this transformational initiative
